

Handy Type Index

and Price List

AMERICAN TYPE FOUNDERS

ATF

ATF Types Offer You

numerous possibilities to express your message in the type best suited to the job. Specimen lines of more than 170 different faces are shown in this new index of ATF Types, including such new series as *Repro Script*, *Brody*, *Franklin Gothic Wide*, *Craw Clarendon* and *Murray Hill*.

Skilled use of these types will add color and interest to any printed piece. Several of the new faces were designed to give display lines a "handlettered" look at only a fraction of the cost of made-to-order lettering!

Best for Printing and Reproduction Proofs

As most printers know, ATF type is the best quality foundry type available. Because of a superior metal alloy used in a precision casting operation, it lasts longer and prints more clearly, with well defined detail. This makes it ideal not only for printing direct from the type, but also for top quality reproduction proofs. Yet ATF type costs little, particularly in the smaller sizes which many printers use only once and discard, without distribution.

Offer Your Customers a Versatile Type Service

with Only a Modest Investment

If you are thinking of adding a casting machine, particularly one for display lines, consider the advantages of far lower investment and greater flexibility of a selection of foundry type.

The wide range of styles and sizes available to you as you need them — the lower cost that makes it possible to discard old faces and add new ones as your requirements change — enable you to offer the most versatile type service with the smallest investment.

ATF Types are Readily Available

ATF's network of type dealerships throughout the country insures immediate availability at convenient locations. In addition, a reserve stock is maintained at the foundry in Elizabeth, New Jersey.

For quickest service, send your orders for type and foundry products to the ATF Type Dealer in your area.

This Handy Index

shows one-line samples of all ATF faces currently manufactured for stock. Most of them are immediately available from the ATF type dealer whose name and address appear on the cover. This catalog also gives complete information on sorts, spaces and quads, leads and slugs, etc. For quick reference, see table of contents on this page.

IT'S EASY TO ORDER any of the type faces or accessories shown. Simply indicate your requirements on an order blank, as furnished by your dealer, or, if you prefer, use your own purchase order or letterhead and mail it to your ATF type dealer. In most cases, he will make prompt shipment from his comprehensive stock.

How to use this catalog

TO HELP YOU CHOOSE the style and quantity of the face you need, just refer to the alphabetical listing of type faces. There you will find, accompanying each sample line, all you need to know about sizes made, number of characters in the font, etc. Here is an example of one of the entries with an explanation of the designations used:

Bernhard Gothic Medium 525

14pt	15A	35o	10-1								

Name and Number of Face

The full name and face number (Bernhard Gothic Medium 525) should be stated, as in some cases several weights and widths of the same face are available.

Alignment Position

The vertical rule in each specimen line graphically indicates the exact body size of the type. This enables you to see the placement of the face on the type body and the alignment position.

Type Sizes

The point sizes given refer to the body size of the type. These are usually simple designations, such as 24 pt, 30 pt, etc. In some cases, different face sizes are available on the same body size, as in the Copperplate Gothics. For instance, 6 pt No. 1, 6 pt No. 2, 6 pt No. 3, etc. Sizes printed 18/24 or 120/96 should be read "18 point face on 24 pt body," or "120 point face on 96 point body."

Various Type Bodies

Most faces are now cast on a regular square body. Some are designed with an extreme slope, necessitating an angle body. Such faces are marked with a "bullet" or round dot. These fonts contain a sufficient quantity of angle spaces. Handmade scripts on wing bodies are Bank Script, Commercial Script, Royal Script, Typo Script and Typo Script Extended.

Contents of a Font

Fonting schemes for every size are also shown. These schemes indicate the quantity of every character contained in the font, in a correct proportion based on the frequency with which the various letters of the alphabet are used.

In our example, 6 pt Bernhard Gothic Medium shows a scheme of 26A, 58a, 21 figures 1. To determine the quantity of the other characters contained in the font, refer to the table on page 24. For the caps, simply follow down the column headed 26. Do the same with the column headed 58 and 21 on the proper "Lowercase" and "Figures" tables.

How to Order

When ordering type, be sure to specify the face name, number and the sizes required. For example:

1 FONT 6 PT BERNHARD GOTHIc MEDIUM 525

When you order one font, packages of caps, lowercase and figures will be supplied, or just caps and figures if no lowercase is made. Capitals, lowercase and figures are packaged separately and may be purchased individually. Just specify "capitals only," "lowercase only," etc., following the type size. Punctuation marks are supplied in both cap and lowercase fonts. Periods, commas, hyphens and dollar signs are also included with figures.

You will most likely need spaces and quads, too and perhaps leads and slugs as well. For complete information on these items see pages 18, 19 and 20.

Identification of Type

When type is ordered to match fonts of doubtful identity, set a word or two and compare with specimen words in this catalog. The face number is stamped on cap H and/or lowercase m where space allows. If still in doubt, the letters H and m should be sent with the order to insure positive identification.

Typewriter Faces

When setting facsimile typewritten letters, extra fonts of lowercase characters are usually needed.

To maintain the appearance of typewritten copy, justifiers should be used between words instead of regular spaces. As justifiers have the same setwise thickness as the characters, they position the letters one above the other, as in typewriting. When ordering justifiers, it is advisable to send samples or to specify the typewriter face for which they are required. Justifiers sell at Table 2104 prices, the same as other spaces. (See page 19.)

Accented Letters

Fonted assortments of SPANISH accented letters are available for 59 faces in 6, 8, 10, 12, 14, 18 and 24 point. See

your ATF type dealer for further information. Larger sizes of Spanish, or accented characters for other languages may be ordered as sorts, in 6" lines per character. (See pages 22 and 23.) When ordering sorts, specify type face and number, size, language and characters desired. If matrices are available, your order will be cast promptly. Sorry, no complete catalog of accented letters is available.

ATF's Sorts Service in Lines

Sorts, in 6" lines per character, can be supplied for all active and discontinued type faces, ornaments, special characters, etc., for which matrices are in our possession. Prices and more detailed information are shown on pages 22 and 23 of this catalog. As sorts are cast to order, a few weeks must be allowed for delivery. *We regret that sorts may not be returned for credit.*

Other Special Casting Services

ATF's Foundry Cast Adeuts and Logotypes are economical and superior in quality to electrotypes. Matrices for almost all trade-marks, emblems, etc., can be engraved to your special order at reasonable prices. Typecasts cast from such matrices can be supplied in any number of 6" lines, with a minimum of one 6" line per cut. (A 6" line comprises as many type, cast from one matrix, as can be placed in a 36-pic-a line.) For additional information on this service, see pages 22 and 23.

For Best Service

Your ATF Type Dealer will gladly answer any further questions you may have. He was appointed to be of help to you. Contact him on all matters pertaining to ATF type and foundry products. His inventory enables him to give you prompt service on most items manufactured by our foundry.

Ask him for a copy of our catalog describing the complete line of typographic accessories, such as ornaments, handypacks, initials, monograms, etc.

You will encounter unnecessary delays by sending your orders direct to the type foundry. Contact your Local Dealer, always! He is most familiar with your requirements.

on orders shipped and billed at one time.

These discounts apply to all fonts of type and all other casting machine products regularly made for stock. Sorts, leads, slugs and fonts made to special order are not subject to quantity discount.

On orders from \$250 to \$499.99.....	2½%
On orders from \$500 to \$999.99.....	5%
On orders from \$1000 and up.....	7½%

Old Metal Information

Ask your ATF type dealer about his policy regarding trade-in allowances for old metal against the purchase of new ATF Type and Foundry Products.

Any quotations made by your ATF type dealer will be as generous as possible. His acceptance of old metal will be consistent with local conditions, trade practices, and market prices.

Important Notice

When a new font of type is to be laid in the case, first pull a proof of it, to identify strange characters and to prove any claim for damaged or missing letters.

Standard Body SizesLeads are strip-metal spacing material in body sizes 1, 2, 3 and 4 point.
 Slugs are strips of the same material, in body sizes 6, 8, 10 and 12 point.**Duratin Leads and Slugs**

are produced in strips 24 inches long. All metal is formulated at the refinery. Scrap metal such as old batteries, lead cables, etc., are not used for DURATIN.

Standard Height

is .759" (electrotype base height). Other special heights such as .853" (high base) and .765" (Ladlow base) are made to order only. Inquiries for price quotations should state height and quantities desired.

Price Schedules

provide lower cost for larger quantities ordered at one time; therefore, Leads and Slugs may not be included with other foundry products for quantity discount purposes.

Schedule 12100

Type Foundry Spaces and Quads

Precision-Cast in Type Moulds

Spaces and Quads are not sold by the pound. Please order by font or item number.

SPACES are non-printing types less than one em in set width. Thickness is commonly designated by the number of pieces that add up to approximately one em, as 5-to-em, 4-to-em, and 3-to-em. Foundry Spaces are cast on the point-set system to quarter points. 10 point 3-to-em Spaces are 3½ points set; 14 point 3-to-em Spaces are 5 points set. 2-to-em is called EN SPACE.

QUADS are cast in sets, two-em or three-em sizes similar to 14 point. They do not contain 14 point. 24 point does not contain three-em Quads. Larger sizes are em Quads.

SPECIAL HEIGHT, Base Height and 7½-inch Spaces and Quads are cast to order in foundry lines only (see Schedule 12100). Spaces or Quads can be shown down to the standard desired LOWER heights of extra cost of 25 cents per 6-inch line in addition to regular cost of material.

INTERMEDIATE SIZES — 5½, 7, 9, 11, 20, 22, 54 and 66 point Spaces and Quads are not put up in fonts or packages. These are larger than 14, 16, 18, 20, 22, 24 and extra Angle Body Spaces and Quads are supplied as sorts only.

JUSTIFIERS. When setting typewriter type, use Justifiers instead of regular spaces. Send sample with order or specify typewriter face for which they are required. For prices, see Table 2104 on this page.

Set Widths of Spaces and Quads in Points

Metal, Brass and Copper Thin Spaces

Metal Thin Spaces

These are 2 point Duratin Leads cut to lengths which correspond to regular type bodies from 12 to 42 point. Packaged in 4 ounce cartons. Sizes available: 12, 18, 24, 30, 36 and 42 point.

Price 55 cents per carton
For larger sizes, regular Duratin Leads may be used.

Copper and Brass Thin Spaces

Half point Copper and one point Brass Thin Spaces are put up in 2 ounce packages of one body size, either Copper or Brass.

Sizes available: 6, 8, 10, 12, 14, 18, 24, 30, 36, 42, 48, 60 and 72 point.
Price, less than 10 packages 70 cents per package
10 or more packages, assorted sizes as desired 55 cents per package

Assortments of Thin Spaces

(be sure to order by number)

No. 20 Assortment, American Thin Spaces: Assortment consists of:

20A package — Copper Thin Spaces

20B package — Brass Thin Spaces

20C package — Metal Thin Spaces

No. 3040 Quarter-size case

Price per complete assortment in case \$14.85

No. 20A Assortment, Copper Thin Spaces:

Includes one 2 ounce package each of 6, 8, 10, 12, 18, 24, 36, 48, 60 and 72 point.

Price per assortment \$ 5.50

No. 20B Assortment, Brass Thin Spaces:

Includes one 2 ounce package each of 6, 8, 10, 12, 18, 24, 36, 48, 60 and 72 point.

Price per assortment \$ 5.50

No. 20C Assortment, Metal Thin Spaces:

Includes one 4 ounce package each 2 point Metal Spaces in body sizes 12, 18, 24, 30 and 36 point.

Price per assortment \$ 2.75

Duratin Metal Quotation Quads and Furniture

Duratin Metal Quotation Quads

Cast in DURATIN Metal, .759" high, with closed bottoms. Turned upside down, quads may be used as electrotype base. A small rib inside open end provides grip for handling with tweezers. Made on regular type-casting machines, equally accurate as Foundry type. Each package contains a single size. Order by package number.

Tabular Quadrules

Typecast material for ruled blank forms. Tabular Quadrules are more economical than separate quads and rules, are composed more rapidly than the separate materials, giving a form that is solid and more accurate. The face of Tabular Quadrules is $\frac{1}{4}$ point.

Tabular Quadrules are cast on 12, 18 and 24 point bodies, in 12, 18, 24, 30, 36, 48, 60 and 72 point widths. Packages weigh about 5 lbs.

Number of Lines of Each Set Width

Per Package

Body 12	18	24	30	36	48	60	72	Total	Pkg. Price
12	1	1	3	3	3	3	3	20	\$11.55
18	1	1	2	2	2	2	2	14	10.80
24	1	1	1	1	1	1	2	10	8.80

What is a Foundry Line?

A "Foundry Line" comprises as many type, cast from one matrix, as can be placed in a 36 pica line (see illustration above).

The cut shown has a 42 point body and a 52 point set width. One 36 pica foundry line = 432 points. Therefore, one line would contain $432 \div 52 = 8$ type.

Use the convenient CONVERSION TABLE on this page to determine the quantity of type in one foundry line. Order a sufficient number of foundry lines to give you the quantity of type required.

Why a 36 Pica Line?

A 36 pica line is the foundry's standard production unit. Fonts too, are made up to the 36 pica measure. However, in sorts one line will contain only one kind of letter, figure or other character.

How to Determine Sorts Prices

Casting methods as well as the body size of the type, determine the price per line. The opposite page shows two price tables: Tables E-1 and E-2. Please read carefully the information at the left of each table, to determine which one applies to your order. Then look up the body size of the item to be ordered in the far left column and read across to determine the *price per line* for the number of lines required.

Take Advantage of Quantity Prices

The price per line diminishes sharply as the number of lines ordered increases. In order to get the lower price, you may combine the total number of lines ordered at one time cast from the same font of matrices.

What may be Ordered as Sorts?

Any item, active or inactive, that can be cast by normal methods and for which we have matrices in our possession.

Delivery

Foundry lines are cast as soon as possible after the order reaches the foundry, provided matrices are available. Since sorts are always cast to special order only, immediate delivery cannot be expected. Ask your ATF type dealer for current delivery information on sorts.

WEIGHT OF 36 PICA FOUNDRY LINES

Point Size	Approx. Wt. in Pounds per Foundry Line	Number of Lines to One Pound	Point Size	Approx. Wt. in Pounds per Foundry Line	Number of Lines to One Pound
3	.070	14.29	18	.396	2.53

16	.336	2.98	144	3.00	.33

ADCUTS AND LOGOTYPES

WHAT ARE THEY? ADCUTS and LOGOTYPES are type slugs of trademarks, signatures, illustrations or similar subjects. They are cast on point system bodies, the same as type, and supplied in 36 pica foundry lines.

WHAT DO THEY COST? They are priced in the same manner as all other sorts in 36 pica lines. Use Table E-1 or E-2, whichever is appropriate.

MATRIX ENGRAVING CHARGE. On initial orders for new adcuts, logotypes, etc., there will be a charge for matrix engraving. The matrix becomes the customer's property. Generally, this charge will be within the following range:

1. Matrix charge for single letter, figure, or simple design. \$12.50
2. Matrix charge for two- or three-letter logotype or trade-mark 16.75
3. Matrix charge for design including four to nine letters. 21.00
4. Matrix charge for design including ten or more letters. 25.00

However, if the matrix requires a mortise or other special treatment because of intricate detail or multiplicity of lettering, ATF reserves the right to make a special quotation. The additional charge for a mortise is usually no more than \$12.50.

DRAWINGS OR ART WORK. All special matrix engraving requires finished drawings or art work, which should be sent to the ATF type dealer along with the order. Send him drawings also if a quotation is requested.

THE ANATOMY OF ATF TYPE

A LIGNMENT

In ATF type, alignment is built into the matrix. The base, or line, of the letter is an integral dimension of the matrix and is not left to the casting machine operator's discretion. Every letter cast from ATF matrices will align regardless of when it is cast. Casting machines not having this feature cannot constantly cast quality type. Accordingly, carelessness, lack of skill on the part of the operator, slippage or wear can all result in different adjustment and alignment on different letters or different castings.

BODY

An efficient body must be strong. Making metal hard is a simple matter, but a metal that will withstand abrasion by paper stocks as well as the abusive pressures of printing and reproduction methods such as stereotyping, electrotyping, rubber plate molding, etc., must be more than hard. It must be tough. ATF type is tough but its toughness rests not alone in the metal formula. To produce a tightly compressed, fine grain metal the molten metal must be cast at high temperature under high pressure in a water-cooled mold. Ordinary type casting machines cannot match the high pressures or high temperatures of ATF casters and few are equipped with water-cooled molds. In conse-

quence, many competitors are unable to match the hardness of ATF type, even if they use ATF metal. By the same token, we can cast harder type from their metal than they can.

Accuracy is another important requisite of the type body. If the body of a character tapers in any direction or if its four sides are not out of square, this character cannot set snugly against its neighbors, is bound to produce a spongy line or form. Here, again, the heavily constructed, non-adjustable mold which characterizes ATF casters assures a degree of accuracy which others can seldom match.

COUNTER AND DEPTH

ATF matrices are engraved—not stamped—in hard nickel brass. They are cut with precision tools which assure clean walls and sharp edges, even at maximum depth. Most matrices are stamped or punched, rather than engraved. Because of this fact they require a softer brass and there is a definite limitation on the depth to which the punches can be driven, particularly in the shaping of counters.

FACE

The face of ATF type has three distinctive features—its design, the efficiency with which it lays ink onto paper uniformly and sharply and

its position on the body. The design of ATF faces is the combined work of the best available talent in type design and type layout, assuring not merely novel but PRACTICAL faces. Their printability comes from their sharp edged, mirror-smooth face and can be obtained only by engraving of the finest sort. The final engraving of ATF matrices is done with tools as fine as .0015 in. thickness, which provide a fine surface for casting. However, ATF goes further to obtain a super-smooth printing surface by giving each matrix a light finishing coat of chromium.

As with "alignment," the position of the face on the body is a precise dimension in the matrix itself, achieved by expert hand finishing. It is not left to the operator, hence it is identical, regardless of when the type is cast.

FEET

The feet of ATF type are always square with the body and parallel to the face, because of the heavy construction of the mold on ATF casters and the care expended in maintaining their accuracy at all times.

GROOVE

The groove in ATF type is machined during the casting operation. ATF casting machine operators are careful to keep their grooving knives both sharp and properly adjusted and thus avoid the burrs that make some other types more than type high or uneven on their feet.

SET

The set of ATF type, like its "alignment," is built into the matrix and is not subject to the variations of an adjustable mold. That the set is always identical in ATF type, regardless of when it is cast, is further guaranteed by the fact that the precise dimension of each character is stamped on the matrix as a guide to the operator and the inspectors who maintain a constant check on the accuracy of the ATF product.

Good letterspacing is normal with ATF type. Each character is fitted individually to look its best with all other letters in its alphabet. Overhanging letters set well because they are properly kerned and rubbed—a PLUS VALUE in ATF type.

TYPE HEIGHT

The carefully controlled depth of ATF's engraved matrices, plus the equally accurate height of ATF molds, produce type of constantly uniform height. Further precaution against inaccuracy is the rigid ATF inspection which discards any type that is over .0005 in. high or low.

ATF

Perfection Type, Inc.

611 Eleventh Avenue South • Minneapolis 4, Minnesota
Telephone Filmore 7451

ATF NON-OFFSET MIX NO. 109

For liquid spray systems — is manufactured according to the same high standards as Flo-Mix powder and like Flo-Mix powder, ATF NON-OFFSET MIX 109 is approved by the Graphic Arts Spray Manufacturers Association as a non-toxic, harmless and non-abrasive substance.

You can use ATF NON-OFFSET MIX 109 in any liquid non-offset unit.

Available in:

- 1 gallon cans
- 30 gallon drums
- 5 gallon cans
- 55 gallon drums

ATF Clear-Proof Ink

Printers like its easy handling and the rich, crisp tone it gives to the proofs they pull.

- Convenient packaging
- Easy application
- Easy cleaning and removal
- RICH, DEEP TONE

Prices: 1 to 11 cans ea. \$2.05
12 or more cans ea. 1.95

BUSINESS REPLY ENVELOPE

First Class Permit No. 892, Saint Paul, Minn.

PERFECTION TYPE, INCORPORATED

Addressee

ATF FLO-MIX POWDER

- Works with any dry spray equipment
- Compatible with all types of ink
- Free flowing
- Non-abrasive
- Non-toxic and harmless
- Economical

For STANDARD WORK, including press

color jobs.

No. 103 (Fine)

For large solid areas, and for varnish jobs.

No. 104 (Medium)

For coarse printing, including certain work.

No. 104-OD and 105-OD

For coarse work with Oxy-Dry Units.

Prices: 10 lb. drum \$ 7.50

50 lb. drum 24.00

- Stop static instantly
- One Application lasts indefinitely
- Dries instantly
- Helps repel dirt
- Easy to apply

Price only \$2.98 a can
\$2.50 each in multiples of 12
